

UnitedHealthcare Community Plan of Florida coverage for Humira and Stelara

To comply with the Florida Agency for Healthcare Administration, we've made the following changes to our Preferred Drug List effective Jan. 1, 2026:

Prior product status	Effective Jan. 1, 2026	Preferred products
Humira brand products	Non-preferred Must use biosimilar first	<u>Biosimilars:</u> Hadlima Adalimumab-ADAZ
Stelara brand products Non-preferred Prior authorization required	Non-preferred Must use biosimilar first	<u>*Biosimilars:</u> Pyzchiva Steqeyma Prior authorization required

These biosimilar products have been identified as interchangeable clinical products by the FDA to the brand products. We also still require ICD-10 diagnosis codes for billing.

New and existing members are required to step through a trial of a biosimilar prior to continuing the brand product or requesting a prior auth for the brand product. We've notified our members of these changes.
