

Enteral Formula Reimbursement Changes and Publication of New Fee Schedules

Louisiana Department of Health posted Informational Bulletin 22-31 regarding changes to enteral formula provided through the Durable Medical Equipment (DME) program effective January 1, 2023. These changes include:

- Publication of a new Enteral Formula fee schedule with updated rates for each HCPCS;
- Removal of the requirement to include the National Drug Code (NDC) for enteral formula reimbursement with the exception of metabolic formulas; which are only available to the Office of Public Health; and
- Publication of a new Metabolic Enteral Formula fee schedule. The NDC will remain a requirement and the rates will remain unchanged for these formulas.
- All prior authorizations (PA) must be submitted without a NDC entered into the PA01 or ePA system. Units requested must be calculated based on 100 kcals and not cans, pouches, packets, etc.

An updated fee schedule is available on the Louisiana Medicaid website.
