TestFlight Instructions for iOS

AuthentiCare® 3.0

Welcome to AuthentiCare 3.0!

This guide is for iOS Testers using TestFlight App Distribution.

To participate in UAT and regression testing for AuthentiCare 3.0, you must:

1. Install the TestFlight App

2. Receive a TestFlight App Distribution invitation

3. Install the AuthentiCare 3.0 test build

4. Enter your CAT-specific Mobile Setup Code

5. Have your Worker ID and password to log in and conduct UAT/regression testing

SECTION 1 | TestFlight Setup

1. Provide Your Email Address to Fiserv's Account Manager

To be added to the TestFlight App Distribution list, send your email address to be used for testing to the Account Manager.
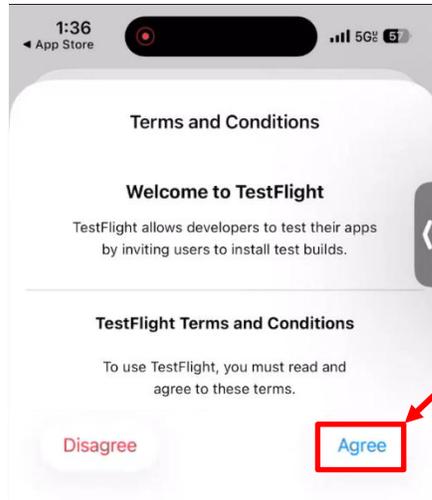

⚠️ *TestFlight requires an Apple ID for app distribution.*

2. Install and Launch the TestFlight App in iOS

A. Navigate to the App Store and search for the TestFlight app.

B. Tap the **Cloud Icon** to download the app. Tap **Open**.

C. Scroll through the 'Terms and Conditions' and tap **Agree.**

D. You will be redirected to TestFlight. The page says 'Ready to Test.'

   *Code redemption is not necessary; please skip this step*.

E. Navigate back to your email to search for the invitation from *TestFlight App Distribution.*
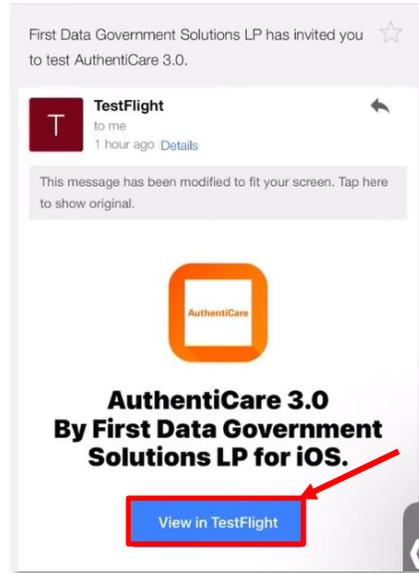

3. Receive the TestFlight App Distribution Invitation

You will receive an invitation email from *TestFlight* with a link to accept.
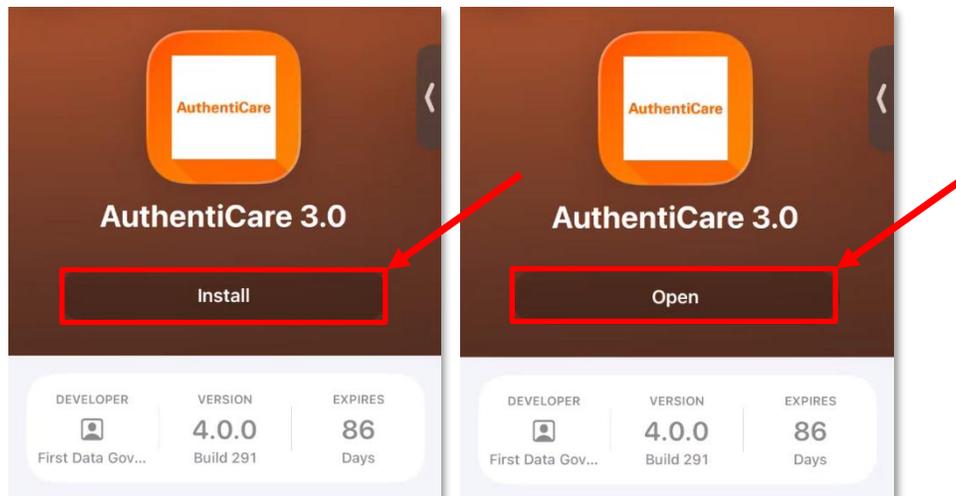

A. Open the TestFlight email

B. Tap **View in TestFlight**

SECTION 2 | AuthentiCare Setup
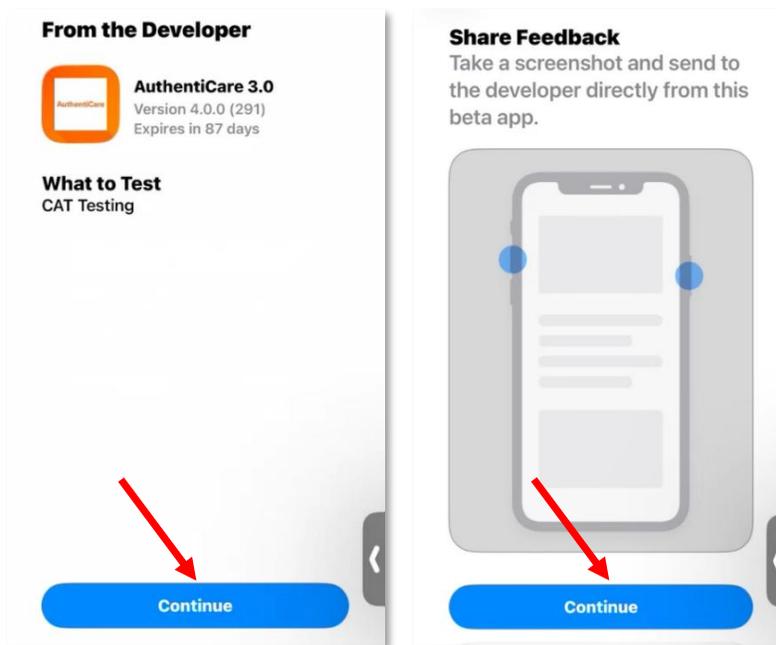

1. **Install and Open the AuthentiCare 3.0 App**

   A. Tap **Install**

   B. After installation, tap **Open**

C. A popup displays for AuthentiCare 3.0 to send you notifications. Select your notification preference.

D. Tap **Continue** on the 'From the Developer' and 'Share Feedback' screens.

2. **Enter Setup Code & Use**

A. Enter your **Setup Code → Submit**

B. You will reach the **Login** screen
