

Firestore Instructions for Android

AuthentiCare® 3.0

Last Updated: 3/16/2026

Welcome to AuthentiCare 3.0!

These instructions outline the end-to-end process for Android User Acceptance Testing (UAT) and regression testing of the AuthentiCare 3.0 mobile application. The application is distributed as a beta (non-public) release through Firebase, with access restricted to approved testers.

To participate in UAT and regression testing for AuthentiCare 3.0, you must:

1. Provide the email address to be used for testing, which needs to be tied to a Google account
2. Receive an email invitation to test AuthentiCare 3.0
3. Download and install the Firebase App Tester app
4. From Firebase, install the most recent AuthentiCare 3.0 test build
5. Enter your UAT-specific Mobile Setup Code
6. Have your Worker ID and password to log in and conduct UAT/regression testing

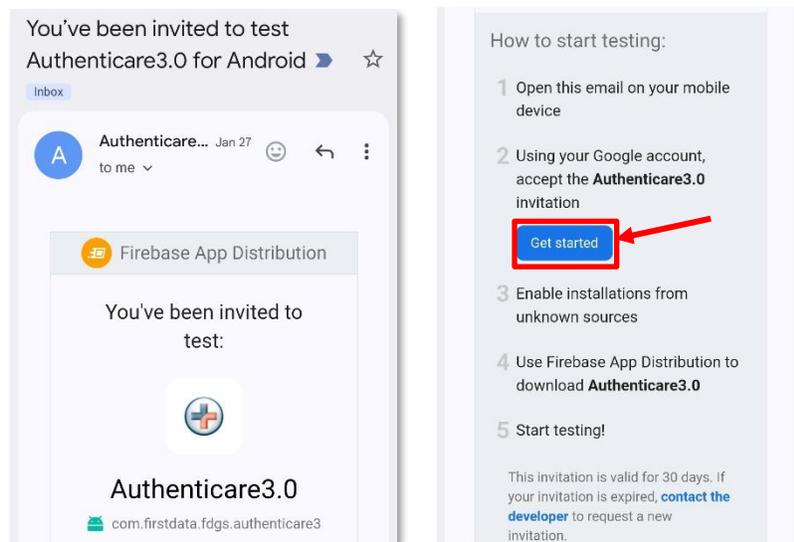

SECTION 1 | Firebase Setup

1. Provide Your Email Address to Fiserv’s Account Manager

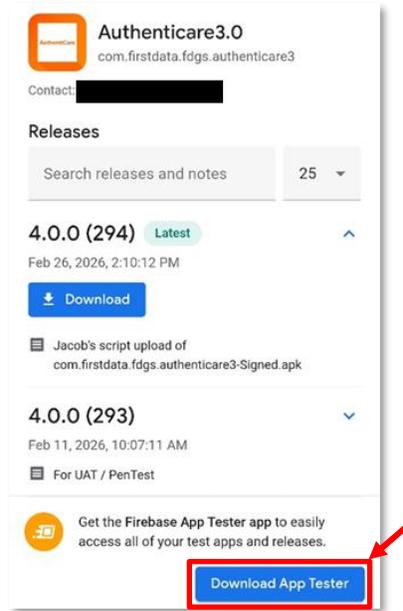

To be added to the TestFlight App Distribution list, send your email address to be used for testing to the Account Manager.

2. Once Added to Firebase, Retrieve the Invitation Email Using Your Android Device

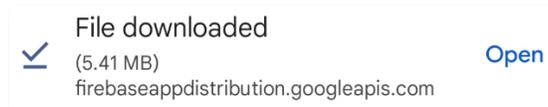

- A. Access to your email inbox and open the email titled “You’ve been invited to test AuthentiCare 3.0 for Android.” Scroll down, and tap the “Get Started” button.

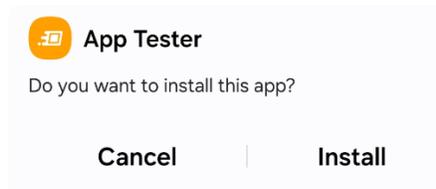

- B. While you have the ability to download AuthentiCare 3.0 directly without using Firebase, it is recommended you download Firebase. At the bottom of your screen, tap “**Download App Tester.**”

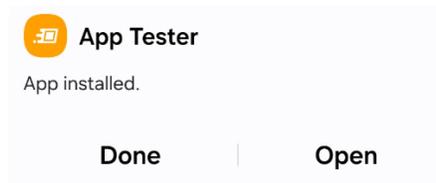

- C. A message will appear at the top, indicating the file has downloaded. Tap **Open**.

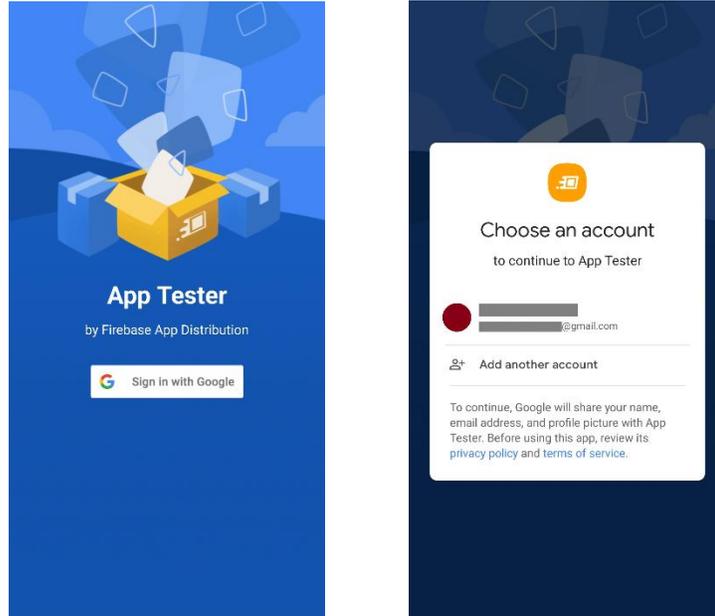

- D. From the Downloads folder, tap **app-tester.apk**. A message appears: “Do you want to install this app?”. Tap **Install**.

- E. When the application has finished installing, tap **Open**.

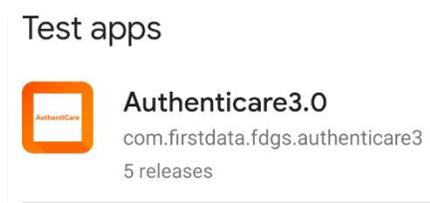

- F. You will need to tap **Sign in with Google**, using the same email address where the invitation was sent. Then, choose your account.

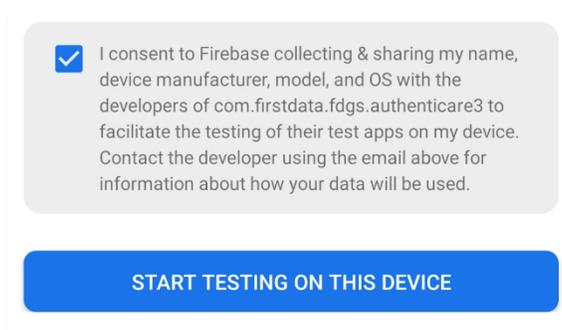

SECTION 2 | AuthentiCare Setup

1. Install and Open the AuthentiCare 3.0 App

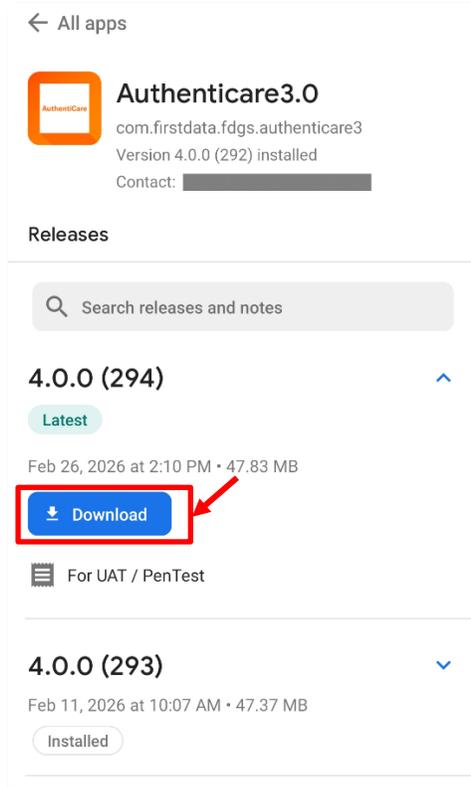

- A. From Firebase, tap the **AuthentiCare 3.0** icon under Test Apps.

- B. Read the consent text, check the box, and tap **Start Testing on this Device**.

- C. From this screen, you will be able to download the most recent build of AuthentiCare 3.0. The build numbers below may differ from those displaying on your phone.

2. Enter Setup Code & Use

- A. Enter your **Mobile Setup Code** → **Submit**
- B. You will reach the **Login** screen to enter your Worker ID and password.
