

Close Gaps and Optimize Care with KMOR

Key Measure Opportunity Report

Key Measure Opportunity Report (KMOR) located in Practice Assist helps you to prioritize patients with immediate care needs. KMOR offers contextual information not found in other reports and recommends personalized steps for each care gap.

How it works

KMOR's dynamic, daily reporting prioritizes patients according to their care needs, ranking them from highest to lowest. It is recommended to work through the report from top to bottom, ensuring that patients with the greatest needs are addressed first.

Getting started with KMOR

You can easily access KMOR reporting through Practice Assist

1. Log in to Practice Assist and select the **Quality** module
2. On the **Sort** drop down, select **Key Measure Opportunity Report** to display your patients in a prioritized list
3. Click the numbered icon under **Key Measure Opportunity Report** to view the patient's prioritized measure and recommendation.
4. To export the report to an Excel document, select **Export All**.
 - a. Choose **Key Measure Opportunity Report** as the export type
 - b. Click **Export**

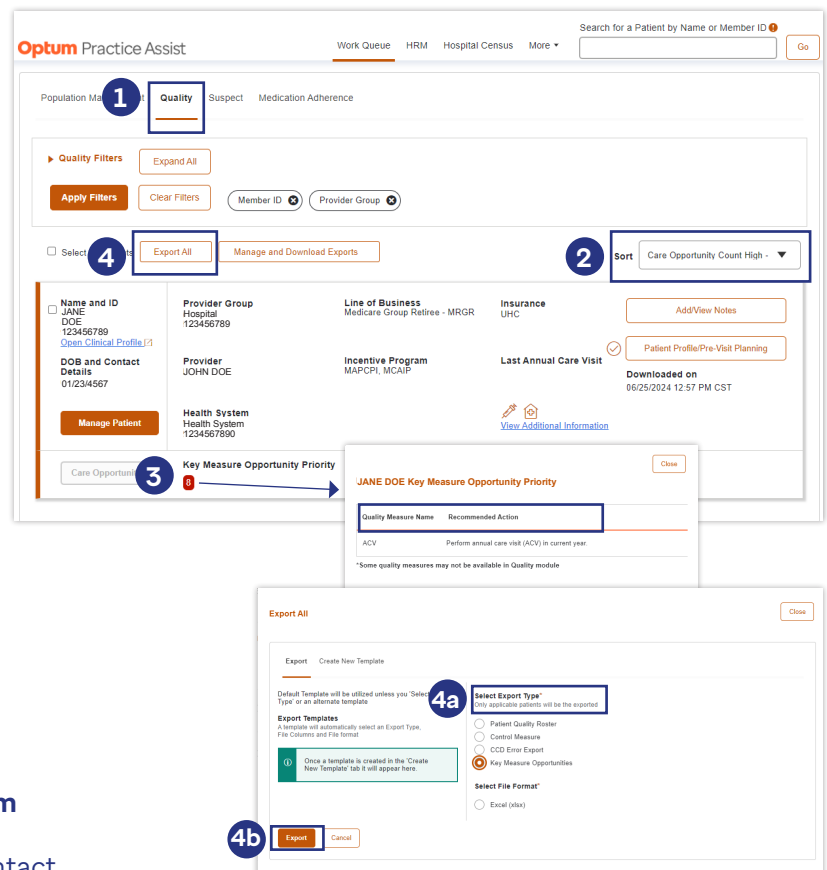

Benefits of KMOR

All your patient's needs in one place

More real-time data for timely care delivery

The screenshot displays the Optum Practice Assist interface. At the top, there's a search bar and navigation tabs for Work Queue, HRM, Hospital Census, and More. The main section is titled 'Quality' and includes a 'Quality Filters' section with 'Apply Filters', 'Expand All', and 'Clear Filters' buttons. Below this is a table of patients with columns for Name and ID, Provider Group, Line of Business, Insurance, and Last Annual Care Visit. A patient named JANE DOE is highlighted. To the right of the table, there's a 'Sort' dropdown menu set to 'Care Opportunity Count High'. Below the table, there's a 'Key Measure Opportunity Priority' section with a numbered icon (3) and a link to 'JANE DOE Key Measure Opportunity Priority'. At the bottom, there's an 'Export All' section with a 'Select Export Type' dropdown menu set to 'Key Measure Opportunities' and a 'Select File Format' dropdown menu set to 'Excel (xlsx)'. There are also buttons for 'Export' and 'Cancel'.
